RE: Letter of Support for Alternate Route
Rock Springs - Green River

Attention: Steve Core, Chairman

Dear Steve:

I am in receipt of the school district letter of support for the above noted project. I have copied Joe Henderson, Short Elliot Henderson and ask that your letter be included in the route feasibility study.

The estimated cost to construct this route ranges from \$25,000,000 for a gravel road north of I-80 to \$65,000,000 for a paved road south of I-80. The challenge will be for the Sweetwater County, City of Green River and City of Rock Springs to come up with the funding to bring the project to fruition.

Detailed information on the feasibility study can be found at the project website through the following link: <http://www.sehinc.com/online.htm>

Sincerely,

John B. Eddins, P.E.
District Engineer
