Subject: City of Foley 2025 Northside Improvements - September 22nd, 2025; Alley Access Impact

Good Morning Residents and Project Stakeholders:

Concrete work is schedule for today, September 22nd, in the alley between 4th Avenue North and Broadway Avenue North, which will affect vehicle access. Residents will be able to access the alley only through the following routes:

- From **HWY 23** for the section between HWY 23 and Murphy Street.
- From **Murphy Street** for the section between Murphy Street and Parent Street.
- From **Penn Street** for the section between Parent Street and Penn Street.

As a reminder, if concrete is scheduled across your driveway or alley entrance, please be aware that the area will be **inaccessible to vehicles** during the forming, pouring, and curing process. Concrete requires **up to 7 days** to cure properly before it can support vehicle traffic.

The project team would like to thank you for your continued patience and cooperation with the construction activities thus far. Feel free to continue to contact SEH with any questions or concerns regarding the project. We hope to respond in a timely manner. However, when more than one team member needs to be consulted, it may take a little longer to provide you with accurate up-to-date information.

Chris Anderson, SEH's Field Representative, will be on-site during active construction to observe project progress. He is the fastest link to problem solving because he communicates directly with everyone on the construction team. Do not hesitate to contact Chris at 320.290.5579 with any questions you may have. If you are unable to reach him in the field, please contact Jarod Griffith at 320.229.4304 or jgriffith@sehinc.com in the SEH office.

Thanks

Jarod R. Griffith, PE (MN)
